

Bianchi BVM 972+676

Bianchi BVM 972+676 is the best combination of two vending machines to one station (master/slave) with one electronic device and payment system for both machines.

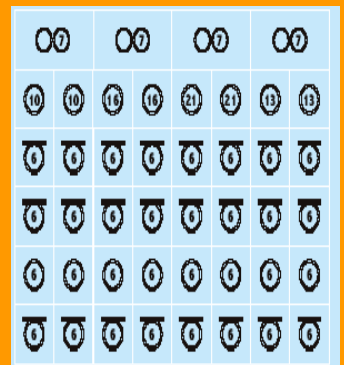

BVM 972 ES or IN combined with BVM 676 to a station is able to manage sales of hot drinks and up to 350 products of the snack vending machine.

Promotion button allows to create a special price for two or even three products, for example hot chocolate, sweet snack and a bottle of water in order to push your sale.

BVM 676 can be ordered as a Snack or Combined version for snacks, cans and bottles.

Large window display of BVM 676 shows all products in an optimal way - no one spring is hidden by a payment system module.

BVM 972 ES and 676 Combined inside:
